

Express Edition - 996905

Integrati Express is a budget focused software solution for Small and Medium Business's (SMBs). Express is a great option for sites that do not need the advanced features of the Professional version. The following base level parameters are included with the Integrati Express Product Key:

1. Connection of one Client Workstation where the client workstation and server are the same machine
2. Connection of one Integrati Controller (ISC or IAC)
3. Support for up to 16 Doors

Some of the features included with Integrati Express:

User/Cardholder Management

The incredibly flexible user permissions provide an easy-to-use, building block method of assigning access and security rights to cardholders. Cardholder profiles are easily created by assigning multiple permissions with simple "Allow" and "Deny" functions.

System Health Monitoring

Monitor the health of both the Integrati hardware and software. Proactive notifications can alert security operators and security contractors if maintenance is required.

Basic Reporting

Single-click reporting to review the areas cardholders have accessed, what areas cardholders have access to, search event and alarm history, programming history and much more. Easily export reports in a variety of common file formats.

SkyTunnel Connectivity

SkyTunnel is an industry-first cloud-based service that provides hassle-free connectivity of Integrati hardware, software and mobile apps.

System Designer and GateKeeper Applications

System Designer is used for all aspects of system programming and configuration. GateKeeper is a dedicated application to simplify day to day monitoring and control of the Integrati system.

Intuitive Design

The Integrati System Management Suite is a true cutting-edge solution. Integrati boasts a contemporary and intuitive design that is simple to use and easy to learn.

Operator Permissions

Manage the operators that use Integrati software. Easily customise and define their access permissions levels with fine control.

Upgrade to Integrati Professional - 996905UPG

Express can be upgraded to Integrati Professional at any time.

Audit Trail

The amazingly powerful forensic audit trail records every programming change made by all operators and provides the ability to "roll-back" to any change in the past.

Express software provides one connection to an Integrati Controller supporting up to 16 doors and can be used only on a single computer workstation. Express offers all the essential functionality required to configure, administer and monitor a single Integrati system. Full operator permissions are provided for added security and Integrati Express can be upgraded to Professional if and when further expansion is required.

Commissioning Software

Integrati Commissioning Software (CS) is a software application designed to be used by installation technicians when they are installing and commissioning Integrati Controllers.

CS can be used to bench program Controllers prior to deployment and to train and familiarise technicians with general Integrati programming techniques.

The Integrati CS application is available as a yearly expiring licence to approved technicians only. This approval is usually granted after appropriate factory accreditation has been undertaken successfully and a level of competency with the Integrati platform has been certified by the Inner Range training department.
